# HARDY PERENNIALS

## HOW TO GROW THEM

Outdoors they may be sown any time in June to August—the earlier the better, for the plants will then become stronger and better established before winter. A cold-frame is an ideal place in which to sow Perennials, but, if you have none, prepare a seed-bed of finely sifted light soil, made rich by adding and mixing with it thoroughly well-rotted barnyard manure, sheep manure, or humus. Sow the seed in shallow drills or squares of suitable size, partitioned off with laths; cover  $\frac{1}{4}$  inch or more, according to the size of the seed—the very fine ones should only be pressed into the soil; press down with a flat board; water gently but thoroughly through a fine rose and do not allow the soil to become dry while the seed is in the process of germination, for as soon as the seed has sprouted and until it becomes a plant with roots, its life depends entirely on soil-moisture. It is fatal to allow the soil to become dry for even five minutes during this period and nearly all failures in growing perennials are attributable to this

neglect. Seed-beds must, therefore, be shaded from the sun in summer and carefully watched and watered until the plants have made from four to five leaves. While most of the hardy flowers germinate in from eight to fourteen days, there are some which take a month or more before they come up, so do not become impatient. If seedlings come up too thick, pull out some and transplant elsewhere in boxes or other seed-beds, and when plants are finally large enough they will be ready for setting out in their permanent places. This, however, should not be done later than October 1, in order to allow sufficient time for them to take a firm hold in the soil before frost. Cover over winter with leaves or salt hay, applied after the ground is frozen (about the middle of December). Too early covering sometimes causes heating and consequent decay of plants, and it also encourages field-mice, which often do harm to the plants. Explicit cultural directions will be found on each packet of our seeds.

	Height	Time of Flowering	Color	Pkt.

NOVELTIES IN HARDY FLOWERS, see page 4

LIST OF HARDY PERENNIALS

Table listing various hardy perennials such as Digitalis, Echinacea, and Geranium, including their height, flowering time, color, and price per packet.

Table listing various hardy perennials such as Matricaria, Meconopsis, and Pansies, including their height, flowering time, color, and price per packet.

A HARDY BORDER PROPERLY PLANNED AND PLANTED

- List of 30 plant varieties and their prices, including Hollyhock, Echinacea, Sweet Rocket, Pyrethrum, and Delphinium.

This sketch of a Hardy Border (B) 50 x 5 feet, consisting of 30 choicest Perennials for continual bloom, shows how to proceed with the laying out and placement of the plants.

Planting Key to Border B

- List of 30 plant varieties and their prices, including Stokesia, Sweet William, Campanula, Penstemon, Gaillardia, and others.

HARDY BORDER (B) 1 pkt. each of above 30 varieties \$6.00 (regular price \$8.50)

SEED OF HARDY PERENNIALS, continued

Table listing various perennial plants with columns for Name, Height, Time of Flowering, Color, and Price per packet (Pkt.).

COLLECTION: 1 pkt. each of above 13 varieties of Viola, \$2.75

Table listing Viola varieties and other plants like Wallflower and Hardy Siberian, including their heights and prices.

Superb Modern Peonies FOR FALL PLANTING

A selection made now assures a special pick of the strongest roots

WE BEGIN TO SHIP OUR PEONY ROOTS IN SEPTEMBER—ORDER NOW

Always plant Peonies in the fall, for the roots are then in prime condition. While they grow well in any good garden soil, they will amply repay any time spent in manuring the surface.

Our Peonies are extra-strong field-grown roots (not divisions)

THE BEST PEONIES FOR 1932

Table listing peony varieties such as Avalanche, Boule de Neige, Canari, etc., with descriptions of bloom colors and prices.

Any of the above sold separately at the prices quoted

- A. The full collection, 1 root each of the 22 varieties, 1 year old, \$25 (regular value \$29.85)
B. Collection, 1 root each of 12 varieties marked (\*), \$12 (regular value \$14.50)

RARE PEONIES

Table listing rare peony varieties like Adolphe Rousseau, Baroness Schroeder, etc., with descriptions and prices.

Plant a Strawberry Bed This Summer

ENJOY YOUR OWN BERRIES NEXT JUNE

One hundred plants, with fair cultivation will yield thirty quarts of berries the first year in a space only 4 by 50 ft.

Utilize the vacant spaces in your garden. Our Pot-grown Strawberry Plants can be set out any time during July and August, and even as late as September 15.

Pot-grown Strawberry Plants

Ready for shipment August 10, but order now. Early Orders always assure Strongest Plants

All varieties offered are perfect flowering, of largest size and best flavor

Three Specials for the Home Garden

PREMIER. Extra early. The largest and by far the firmest of all early varieties. Fruit of a brilliant scarlet-crimson color and very luscious, having a delightful aroma and a rich, wild Strawberry flavor.

BIG JOE. Midseason. An unusually healthy, vigorous, and productive variety. The berries are large, light glossy crimson, and of excellent flavor.

CHESAPEAKE. Late. Possibly the finest and most luscious of all Strawberries for the home garden. The berries are very large and firm and have the luscious flavor of the wild Strawberry.

In planting the above three varieties, you will lengthen your Strawberry season considerably and have berries for fully a month.

Pot-grown plants of the above, \$2.50 for 25, \$3 per 100

Marshall. A very large midseason berry of rich flavor and almost devoid of acid; of a beautiful dark crimson color when fully ripe; very productive.

Barrymore. Midseason. Large, broad and bluntly conical; firm and of excellent quality.

Bushel Basket. Recognized as the largest Strawberry. The fruit is firm and of finest flavor. \$3 for 25, \$10 per 100.

Edmund Wilson. The Giant Strawberry, introduced by Dr. Van Fleet. Very dark in color, of immense size. \$3.50 for 25, \$12 per 100.

Big Late. One of the best late varieties. Produces big berries in large quantities; flesh firm and of fine flavor. Splendid shipper; fine keeper.

Glen Mary. An old favorite midseason variety, especially in the eastern part of the country where it seems to do best. Fruit large, dark red, rich and juicy, with fine flavor.

Howard No. 17. Good medium-early variety with a long bearing season. Strong grower. High quality berries of fine appearance.

Senator Dunlap. An early midseason variety that is unexcelled for marketing. It succeeds in all parts of the country and is very productive. Fruit medium to large, very firm and attractive.

William Belt. A midseason to late variety unexcelled for table use.

Strong pot-grown plants, except where especially priced, \$2 for 25, \$7 per 100

Fall or Everbearing Strawberry Plants

Just as luscious as the June varieties. Bearing in September and October; in fact, they fruit continuously from June until frost, but if you want a heavier crop of berries in the fall, pinch out all blossoms until about July 20 or August 1.

PROGRESSIVE. We consider this the best and most productive of the fall-fruiting varieties. The berries are produced in large clusters and have a fine aromatic flavor. \$3 for 25, \$10 per 100.

Mastodon. The sensational new Everbearing Strawberry that places the growing of this class of Strawberries on a profitable scale. Mastodon makes it possible for you to have ripe Strawberries not only in the spring, but also all summer and fall.

The Mastodon is of tremendous size, 2-ounce berries being not exceptional, and the flesh is firm and of splendid color. Its flavor is excellent and it has every quality desired in a fine Strawberry. \$4 for 25, \$12 per 100.

Beautiful German Iris

We offer here a list of the choicest and most improved of the more recent developments. Planting can be done from August until frost.

Table listing German Iris varieties like Afterglow, Alcazar, Ambassador, etc., with columns for Name, Price per plant (Each), and Price per dozen (Doz.).

Special Collection Offer: 3 each of the above 38 varieties (114 in all), \$50

Very Special: GERMAN IRIS IN MIXTURE

A beautiful mixture comprising only the modern improved varieties, just what you want for mass planting, to naturalize in beds, as an outline to shrubbery, along woodland walks, etc.

# GROW YOUR OWN

## HARDY FLOWERS FROM SEED

It's Lots More Fun—NOW is the Best Time to Do It

1931

Everybody wants Perennials—and wants them in generous measure, to secure the desired effects in color and charm. If you delay and finally buy plants, the cost mounts high; an attractive Perennial border may require several hundred dollars' worth of plants.

Exactly the same result can be secured with \$10 to \$15 worth of SEEDS! And aside from the money-saving you have the fascination of growing your own plants, nursing them from the beginning, and loving them all the more! Sow your seeds now, and the plants will bloom next year.

## THE ROCK-GARDEN

Perpetual is the joy of the garden-lover who plans and builds a rock-garden, and there are really few places where something of this sort might not be attempted, especially where rocks and stones are plentiful. And how interesting to watch the development of the many rare and charming plants that spread, creep, and cover the ground, and hang over and partly hide the rocks. There is a real thrill to be had from this form of gardening.

We offer here a select list of seeds of hardy plants which are especially happy growing between the crevices of stones and on elevated positions. To enhance the pleasure derived from a rock-garden, grow your own plants from seed.
